SUMMARY

Full Stack Developer in training with hands-on production experience using React.js, Node.js, and MySQL. Seeking an SDE role where strong fundamentals in DSA, OOP, and REST APIs can drive real impact.

SKILLS

Languages	Python, Java, C, JavaScript, SQL, PHP
Frontend	HTML, CSS, Tailwind CSS, React.js, WordPress
Backend	Node.js, REST APIs, API Integration
Databases	MySQL, MongoDB, PostgreSQL
Tools	Git, GitHub, Docker, Postman, Linux, Google Colab
Core Concepts	DSA, OOP, Agile, SDLC

EXPERIENCE

Freelance Web Developer — VEYRA (E-Commerce Brand) November 2025 – January 2026

- Designed and delivered a mobile-first Shopify e-commerce website spanning 5+ storefront pages, optimized for performance and cross-device compatibility.
- Customized Shopify themes using Liquid, HTML, CSS, and JavaScript to build reusable sections; configured domains, DNS records, and GoDaddy hosting for production deployment.
- Gathered client requirements to implement UI/UX layouts and navigation flows aligned with conversion-focused design.

Web Developer Intern — Dnyanprassarak Mandal’s College August 2023 – December 2023

- Delivered a web-based assessment and analytics platform with real-time data visualization dashboards, reducing grading time by 70%.
- Built Excel-based data ingestion pipelines and interactive charts to monitor academic performance across 8+ courses per semester.
- Optimized frontend workflows and application logic, improving system performance by 40% and saving 4–6 hours of manual effort weekly.

PROJECTS

VEYRA – E-Commerce Website (Shopify, Liquid) [\[Link\]](#)

- Extended Shopify theme with Liquid, HTML, CSS, and JavaScript to build reusable storefront sections across 5+ pages with optimized navigation and product layouts.
- Enhanced UI with clear CTAs, consistent styling, and mobile responsiveness to improve user engagement and conversions.

Library Management System (Core Java, JDBC, MySQL) [\[Link\]](#)

- Developed a console-based backend app using Core Java, OOP, and 3-tier architecture; implemented CRUD operations via JDBC with a modular DAO-based structure.
- Designed normalized MySQL schemas and a reusable DBConnection utility with robust exception handling.

CO-PO Mapper: Academic Outcome Attainment Tool (HTML, Tailwind CSS, JavaScript) [\[Link\]](#)

- Built a data-driven web app tracking academic outcomes for 60–80 students with automated grading and real-time chart dashboards aligned with Bloom’s Taxonomy.
- Streamlined Excel bulk uploads and client-side processing, reducing manual workload by 50–70%.

EDUCATION

Master of Computer Applications (MCA) — AIML Specialization August 2024 – Present
Jain (Deemed-to-be University), Bengaluru CGPA: 7.3 – Ongoing

Bachelor of Computer Applications (BCA) June 2020 – April 2023
Dnyanprassarak Mandal’s College and Research Center, Goa CGPA: 8.3
